

Graduate School of Information and Communication

Major Requirements	G1 (theory), G2 (computer system), G3 (communication), G4 (s/w application)
Major Electives	Advanced Computer Vision, Web Security, Artificial Intelligence, Information Retrieval, Computational Biology

Introduction

The Ajou Graduate School of Information and Communication (GSIC) was founded in September 1999 when it was named a participant of the BK21 information technology development program. The GSIC had special goals of education and research during the BK21 program to foster the specialized research, educational systems and programs essential to cultivate manpower in computer systems, information and communication, software and applied industries. As the missions were successfully completed, actual activities were merged and migrated into the Department of Computer Engineering in the Graduate School.

The GSIC now runs minimum activities including supervising Ph. D. students who enrolled during the BK21 program. Please refer to the website of the Department of Computer Engineering in the Graduate School for further information of research and educational activities.

Goal of Education

Cultivation of advanced professionals with competence in information and technology who can contribute to the creation of added value in the information society.
